COORDINATION CHEMISTRY REVIEWS

Main Group Chemistry

Contents

Some aspects of the chemistry of silylidene-phosphanes and-arsanes
M. Driess 1

Phosphine complexes of the heavier p-block elements: aspects of structure and bonding
N.C. Norman and N.L. Pickett 27

Multiple coordination of carbonyl compounds by multidentate main group Lewis acids
J. Vaugeois, M. Simard and J.D. Wuest 55

Silicon derivatives of the metals of groups 1 and 2
P.D. Lickiss and C.M. Smith 75

1,1-Organoboration of alkynylsilicon, -germanium, -tin and -lead compounds
B. Wrackmeyer 125

The molecular structure of organogermanium compounds
K.M. Baines and W.G. Stibbs 157

Recent developments in the organometallic chemistry of phospha-alkynes, RC≡P
J.F. Nixon 201
